

## Hand Book Of Human Values Concept of Human Values:

Human values are the virtues that guide us to consider human element when one interacts with other human beings. They are our feelings for the human essence of others. It is both what we expect others to do to us and what we aim to give to other human beings. These human values give the effect of bonding, comforting and reassuring.

There are five stem values and many sub-values or virtues that come from the main values. Together they make up the tapestry that forms an individual of character, containing all that makes a human noble, caring and kind.

- Love
- Peace -Using the tool of the mind
- Truth -Using the power of intellect
- Right Conduct -Using the tool of the body
- Non-violence -Awakening the spirit within

Human Values cannot be taught in a class room setting. To inculcate human values an individual must go out & get engaged with the community. By practically working in the field, an individual gets sensitized towards the social issues & problems; learns his/her roles & responsibilities towards society & nation. One learns about the structure & functioning of various social agencies & realizes the importance of cooperation & participation towards the social programs initiated by them. The idea is to transform an individual into a socially responsible being who is also an accountable citizen. Philosophy of Human Values at Mahila Arts Commerce College, Chandur-Rly.

College has a strong inclination towards instilling & inculcating human values among its students so that when they pass out they not only become outstanding professionals but also stand out as individuals with strong ethics & character.
